-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000-16392 in view of Bochan (3,118,468). JP '392 teaches a propulsion system, comprising: a vehicle producing exhaust; a conduit connected to said vehicle, the exhaust flowing through said conduit; and an exhaust altering attachment 2 or 17 (depending on which embodiment) disposed on said conduit, the attachment having a deformable slit (either 4 or 18) having inwardly and outwardly opposing portions defined therein. The slit functions as a check valve in that it prevents the reverse flow of the water. JP '392 does not teach the slit has a generally elongated S-shaped slit. Bochan teaches a resilient S-shaped check valve having inwardly and outwardly opposing portions where the S-shape having inwardly and outwardly opposing portions is demonstrated as being superior to the conventional straight slit (col. 1, lines 15+) – compare with Fig. 2 of JP '392 and also being superior to the multiple straight slit configuration (col. 1, lines 28+) – compare with Fig. 7 of JP '392. The advantage of the S-shape includes reducing the stress. It would have been obvious to one of ordinary skill in the art to make the exit

attachment of JP '392 with an S-shape, as being superior to the straight slit or multiple slit or to reduce stress. The use of the S-shape for the exhaust will inherently result in the three dimensional helical pattern as the structure is analogous to that disclosed.

***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
